iDiversicons is a game-changing app that pioneers diversity and inclusion, offering for the first time an amazing new iPhone and iPad-compatible keyboard with a truly diverse emoji. Representing an entire world of faces, iDiversicons has over 900 emoji to choose from. So no matter where on earth you're from, chances are you'll see faces that look like you.

iDiversicons, the world's FIRST diverse emoji, has evolved into a new seamless iPhone and iPad keyboard with unlimited capabilities and user benefits.

**Audience:** Emoji have galvanized the way we communicate in this digital age. Approximately 8 trillion text messages are sent each year around the world. Emoticons are used to enhance online communication through text, email and other social media networks. With iDiversicons, you may communicate quickly, silently or both. Using emoticons makes it fun when there is no time for a conversation, or if it is too noisy. Anyone with a mobile device will appreciate these differences. The world has been waiting for something NEW! And we found it...a simplistic way to use iDiversicons to brighten your day. iDiversicons can be used in most applications that support media, including Multimedia Messaging Service, Email and iCloud Messages.

**About the Developer:** Katrina Parrott, a former NASA Program Manager created this App through Apple's and Google's Developer Program. iDiversicons was initially created to satisfy a desire that my daughter (Katy Parrott, UT Austin student) expressed "wouldn't it be nice to have emoticons that look like the person sending them." We discovered that there is a demand for more diverse emoticons. We successfully created UNIQUE emoji that represent everyone!
